

Churchill County Library Computer Use Policy

The Churchill County Library is pleased to make computers available to our patrons. To ensure that the service operates smoothly, the following rules govern use of all computers.

1. Staff can provide some minor help when available, but computer use is independent.
2. The library provides commercial software to be used in the library only. Copying of commercial software is prohibited. Patrons are not allowed to load their own programs on the hard disk of the library's computers.
3. Patrons who wish to save data files should bring their own USB drive, writable DVD, or have access to an online service or email account to send materials to. Materials saved to the library computers are wiped from the drive automatically upon reset. The library is not liable or responsible for lost data or USB drives or DVDs.
4. Any use of the computer to facilitate illegal activity is prohibited. Unlawful activities may result in criminal prosecution.
5. Access to the internet is not filtered or restricted on any of the computers.
6. Access to pornographic materials is prohibited.
7. The library charges ten (10) cents for each page printed.
8. Abuse of the rules will result in loss of computer privileges. Staff members have the right to restrict computer use by those who cannot abide by the library policies.
9. Library staff has the right to cancel or interrupt use of any computer for any reason.
